Response to Arguments

1. Applicant's arguments filed 10/7/04 with respect to claims 11-13 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 11 is indefinite because there is no antecedent basis for the limitation "**said at least two heterogeneous moving picture video streams**" in line 7.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Obikane (U.S. 6,404,818 B1).

Regarding claim 11, Obikane discloses a system comprising:

a processor (25);

Art Unit: 2611

a storage (buffer circuits) coupled to said processor;

a video controller (26) coupled to said processor; and

a packetization device (21B-22B) coupled to said video controller (26) to independently packetize at least two heterogeneous video streams (S_{VL} , S_{VM}) for transmission thereof to a display device (television receiver) without converting formats and frame rates of said at least heterogeneous moving picture video streams to a common output format and rate (not converting formats and frame rates of the video streams during packetizing) (see figure 12; col. 10, lines 63-67; col. 8, lines 37-42 and 59-62).

Regarding claim 12, Obikane discloses a modulation device (21C-22C) to modulate and transport independently packetized streams (see col. 8, lines 45-55; col. 8, line 62 to col. 9, line 3).

Regarding claim 13, Obikane discloses each of video streams, e.g., S_{VL} and S_{VM} , having different frame rates, is packetized to be depacketized at its frame rate in the television receiver (see col. 12, lines 27-32 and 53-60; col. 13, lines 5-10).

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2611

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
